

Picking Assistant

MODEL PA1400

The CropCare® Picking Assistant is designed for all your small to large scale crop harvesting, weeding, planting, and bed maintenance needs. The deceptively simple design increases the efficiency of your field workers and keeps them going strong throughout the day. Multiple units can be pulled at the same time by an ATV or small vehicle. Now you can minimize your harvesting losses for crops with a short picking window. The low cost of investment in the CropCare® Picking Assistant will quickly repay itself with your increased profits.

Standard Features

- Dual high torque gear motors
- Long lasting 12 volt deep cycle battery and charger
- Durable, easy to clean comfort pads
- All weather canopy
- Picking height adjustment 20" to 30"
- Width adjustment 36" to 66"
- Ground speed (approx) 18 ft per minute
- 2 year Limited Warranty

Works well for strawberries planted on matted rows and raised beds

Motor

Dual high torque planetary gear motors provide forward and reverse motion in all types of terrain.

High torque planetary gear motors

Battery and Charger

Long lasting 12 volt deep cycle battery and charger. Will keep your picker moving for up to two days of normal use.

Height Adjustment

To keep your pickers in reach of the crop no matter their size or the terrain, quick-release pins and cushioned handles enable easy raising and lowering of ride height. Adjusts from 20" to 30."

Adjust ride height from 20" to 30"

Produce Tray

Large tray holds five flats to minimize trips to and from the field.

Comfort Pads

Durable and easy to clean, these vinyl covered foam pads are adjustable to keep pickers comfortable no matter their height.

All Weather Canopy

Protects operator from the elements. Roll-up side curtains keep you dry or protect you from the sun no matter the weather.
